

Guide to Ohio Native Plant Nurseries and Landscapers 2006

Provided below is a list of plant nurseries and landscapers who advertise native plants. This list does not represent endorsement by the USDA:NRCS, Audubon Ohio or the National Audubon Society. The consumer should be aware that the retail outlets and suppliers listed below may not sell native plants exclusively, so one should select plants for landscaping after doing some research on desired natives. To identify an appropriate native plant species, find out what is native for your location and habitat type, and then take a list with you when you visit or contact the nursery.
